

Quality Improvement Activity – implementing health assessments in your practice

This session is focussed on processes for implementing health assessments as a Quality Improvement Activity.

Session information

The session will be covering:

- what health assessments are available for your patients?
- how to use POLAR and Walrus to identify eligible patients
- health assessment billing
- tracking your quality improvement results
- available resources.

Attendees will be provided with tools, walkthroughs and information including PDSAs

This event is suitable for all practice staff. We will not be covering how to perform a health assessment, this will be covered at EMPHN's nurses event in September.

Learning outcomes:

- what health assessments are available?
- what is the criterion for health assessments?
- be able to use POLAR to generate patient searches for eligible patients
- implementing a Quality Improvement Activity.

There will also be opportunity to ask questions from our presenters.

Event details

Date: Thursday 17 August 2023

Time: 12.30 – 1pm

Online: Via Zoom
