

# Hyperemesis gravidarum and common third trimester obstetrics conditions

## SESSION DETAILS

Learn the latest evidence in managing third-trimester conditions (gestational diabetes, hypertensive disorders, fetal growth) and develop postpartum management plans. Delve into the complexities of obstetrics, covering antenatal and postpartum care, with a focus on primary health follow-up. Additionally, discover evidence-based approaches for hyperemesis gravidarum.

## LEARNING OUTCOMES:

- describe latest evidence in the management of hyperemesis gravidarum
- analyse current evidence in management of common conditions in third trimester of pregnancy (gestational diabetes, hypertensive disorders and fetal growth)
- develop management plans for more prevalent medical conditions (gestational diabetes and hypertensive disorders of pregnancy) in the postpartum period, as per current best practice
- describe latest evidence in management of complex obstetrics issues (gestational diabetes, hypertensive disorders, fetal growth) both antenatal and postpartum relevant to primary health follow-up
- identify relevant HealthPathways.

## SPEAKERS:

- Dr Siaw Hui Wong, Head of Medical Obstetrics, Northern Health
- Dr Ekaterina Jovic, Consultant Obstetrician and Gynaecologist - Northern Health

Activity ID: 751257

RACGP CPD: 2 hours Education Activities
