

IT security update – your patients, practice and privacy protected

Are you confident your practice is secure when it comes to the information entrusted to you by your patients? Join us as we discuss privacy and cybersecurity in practice.

Event details

In this session we will examine emerging cyber trends, the implications for you and your practice, as well as tips, tricks and lessons learned from others misfortune. Come away from the session with a better understanding of:

- current cyber risks and trends
- the implications for your practice and staff
- a cybersecurity framework and questions for your managed service provider
- plus a privacy audit/checklist to take back to your practice.

Please bring to the session your practice's privacy policy and data breach response plan (if you have one).

Learning outcomes

- identify emerging cyber risks in a healthcare setting
- manage mitigating strategies and behaviours in your practice
- assess your privacy policies and data breach response
- implement strict password management.

Speaker

Darcy Inglis, Managing Director, Honestally Consulting

Honestally Consulting reviews and implements systems, procedures and technology-based solutions, helping healthcare organisations achieve best-practice, compliance and accreditation.
