

My Health Record expansion: benefits for you and your patients

For GPs, specialists, pharmacists, allied health professionals and practice managers

Eastern Melbourne PHN (EMPHN) invites you to an interactive workshop focusing on the expansion of the national My Health Record system. A significant proportion of healthcare providers within the EMPHN catchment are connected and utilising the My Health Record features to provide effective and efficient care to their clients.

This session provides an opportunity to hear from your peers and other healthcare providers within the EMPHN catchment about how they are maximising the benefits and engaging with their clients/patients to drive uptake of the My Health Record system.

This workshop will include a broad overview of My Health Record followed by breakout sessions tailored for each discipline that will cover specific information on the benefits, privacy and security features and communicating the benefits to consumers.

This workshop will:

- ✓ Help you to understand what you need to do to maximise use of the My Health Record system
- ✓ Assist you to respond to enquiries from your clients/patients
- ✓ Provide you with essential information to be able to inform your peers on how they can get the most out of the My Health Record System.

A detailed workshop program will be circulated closer to the event.
