

Reproductive Carrier Screening

Supporting women and couples to make informed choices.

RANZCOG now recommends that information about reproductive carrier screening for common disorders be offered to every woman either prior to conception (preferred) or in early pregnancy. This update will help GPs negotiate the rapid evolution of testing now available in this area, to support couples in making an informed choice regarding screening.

Presenters:

- **Mrs Nikki Gelfand** *Genetic Counsellor, Monash Genetics*
BSc PostGradDip(GC) FHGSA
- **Dr Abhijit Kulkarni** *Principal Scientist, Cytogenetics, Monash Pathology*
MBBS,MD,DNB,FRCPATH (UK)

Date: Thursday 7th March, 2019

Venue: Lecture Theatre 2
Monash Medical Centre
