

# Improving cancer care within primary care

*This interactive workshop, presented in partnership with Eastern Melbourne PHN, North Western Melbourne PHN and South Eastern Melbourne PHN, aims to bring together clinicians from primary and tertiary care to discuss the enablers and barriers to implementing best-practice cancer care in metropolitan Melbourne.*

## Learning outcomes

- support early detection, initial investigations, and timely and appropriate referrals to specialists, ensuring that people obtain the most effective care at the right time.
- identify how patients with cancer will be managed in the local context inclusive of appropriate localised Optimal Care referral pathways.
- identify barriers to best practice cancer care and support the development of feasible quality improvement efforts to address these gaps.
- develop processes and gain confidence within their practice to share knowledge and utilise pathways to manage their patients.
