### New Legislation

A number of pathways have been developed to support GPs with navigating practice changes due to new legislation. This includes: Medicinal Cannabis, MyHealth Record, SafeScript and Voluntary Assisted Dying.

### Statewide Collaboration

Department of Health and Human Services (DHHS) and Victoria and Tasmania Primary Health Network Alliance (VTPHNA) funded statewide work were a big focus for the year. Pathways were developed to support the Optimal Care Cancer Pathways, the SafeScript implementation, the Acute Specialist Clinic reform and the Statewide Paediatric HealthPathways project.

### Technical Integration

Successful HealthPathways Melbourne eReferral Integration commenced this year. The eReferral integration allows general practices referring to Austin Health, Eastern Health and Northern Health and using compliant clinical software to access HealthPathways Melbourne referral pathways from the electronic referral template. 1,137 pageviews have been result of this integration since March 2019.

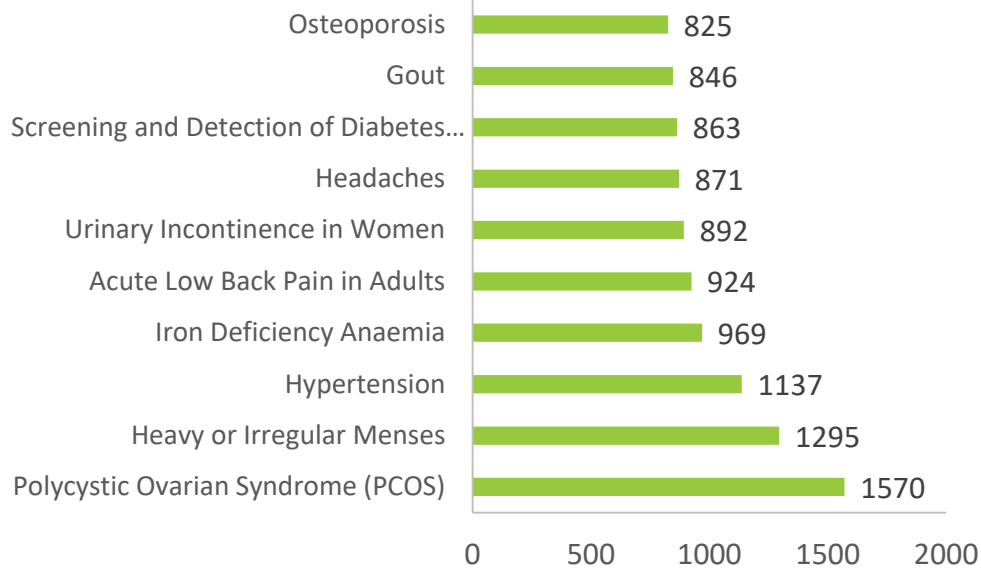

### GP Engagement

A focus on GP engagement has helped drive the increase in number of users and number of general practices with automatic login to HealthPathways Melbourne.

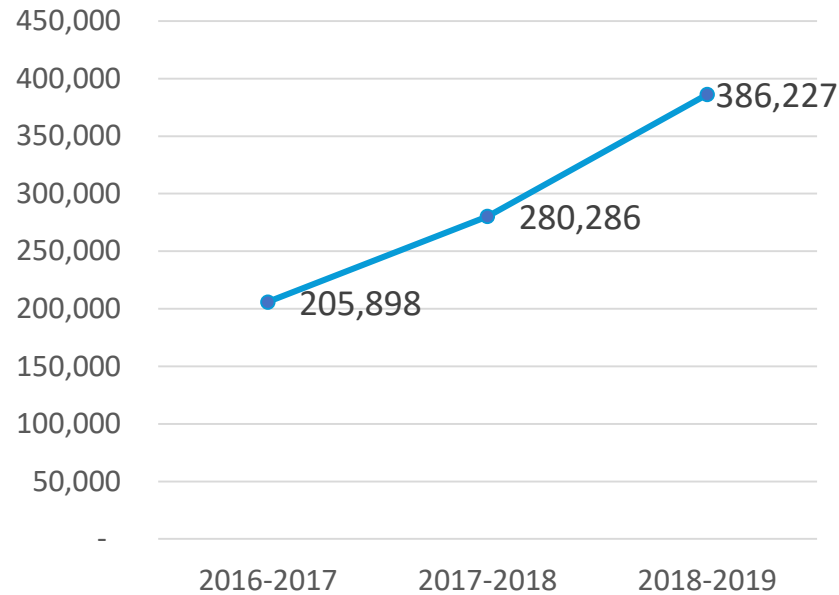

Automatic login to the website provides GPs with a more seamless experience, thus encouraging more frequent and more meaningful use of HealthPathways Melbourne.
