

# Curing hepatitis C: your role as a primary care nurse

## Webinar

This webinar series will provide nurses working in primary care with background information about hepatitis C along with information on testing and management of their patients.

**Webinar one:** Hepatitis C background and screening.

**Webinar two:** Treatment and monitoring.

### Learning Outcomes

By the end of these session you will be able to:

- Understand the process involved in hepatitis testing and screening.
- Describe the management of hepatitis C including treatment and monitoring.
- Discuss risk factors for hepatitis C with your patients.

### Speaker - Dr Jacqui Richmond

Dr Jacqui Richmond commenced working as a hepatology nurse in 1998 at St. Vincent's Hospital, Melbourne. She completed a MPH (Deakin University) in 2000 and a PhD in 2006 at the University of Melbourne.

Jacqui is currently the Education and Training Program Manager for the Eliminate C Partnership and acts as an advisor, and chair on multiple working and advisory groups. Jacqui is also a part time Research Fellow at the Australian Research Centre for Sex, Health and Society, where she is working on a range of projects exploring cure in the context of hepatitis C infection.
