

**Want
to stay
healthy?**

**It starts
with you**

**Choose to vaccinate
against COVID-19**

It's safe. It's free. It protects.

Choose to vaccinate and you, the people you care about and your community all benefit. That's because getting vaccinated helps protect you from getting sick from COVID-19.

The more people who get vaccinated, the greater likelihood of borders opening, travel resuming, jobs being secure and family and friends staying safe.

Many people are now eligible to receive the COVID-19 vaccine. This includes Australian citizens, permanent residents, refugees, people seeking asylum, temporary and provisional visa holders (including international students and temporary migrants).

The vaccines are voluntary, safe and free for everyone. They are very effective and as more people are vaccinated, the more the community is protected. This makes it harder for COVID-19 to spread and reduces the risk that new variants could emerge. The best person to talk to if you have questions about vaccination, is your GP.

Keeping yourself and your community safe starts with you.
