MyMedicare

- MyMedicare is a **voluntary patient registration model** to formalise the relationship between patients, their general practice, general practitioner (GP) and primary care teams.
- MyMedicare responds to the **Strengthening Medicare Taskforce** recommendation to introduce a system of **voluntary patient registration to support continuity of care.**

MyMedicare: General Practice in Aged Care Incentive

- The General Practice in Aged Care Incentive will support every permanent aged care resident to receive high quality primary care services from a regular GP and practice by incentivising proactive face-to-face visits, regular planned reviews and coordinated care planning.
- The General Practice in Aged Care Incentive will commence when the current Aged Care Access Incentive ends from 1 August 2024.
- Practices and providers will be able to register themselves and their patients for the incentive through the MyMedicare program and begin delivering eligible services from **1 July 2024**.

MyMedicare: General Practice in Aged Care Incentive

- Each quarter providers and practices registered with MyMedicare, who meet the **eligibility and servicing requirements**, will receive an incentive payment.

Payments are:

- **\$300** per patient, per year, paid to the responsible provider
- **\$130** per patient, per year, paid to the practice.

MyMedicare: General Practice in Aged Care Incentive

Regular visits

The responsible provider and their care team must deliver:

- at least **two eligible regular visits per quarter**
- delivered in separate calendar months
- with a **minimum of eight regular visits per 12 month period.**

MyMedicare: General Practice in Aged Care Incentive

Care planning

The responsible provider must deliver at least **two eligible care planning items within a 12-month period.**

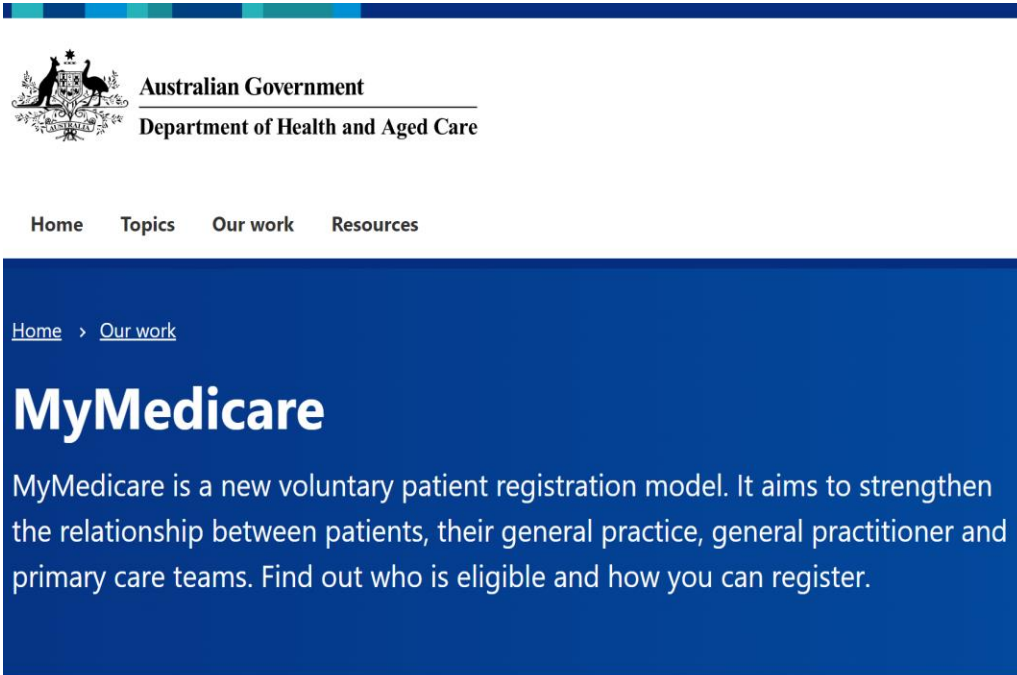

These includes a range of Medicare Benefits Schedule (MBS) and Department of Veterans' Affairs (DVA) items:

- comprehensive medical assessment
- contribution to, or review of, multidisciplinary care plan
- multidisciplinary care conference (GP arranged or participated)
- Residential Medication Management Review.

MyMedicare: Wraparound Primary Care for Frequent Hospital Users program

- The Wraparound Primary Care for Frequent Hospital Users (FHU) program will introduce a new incentive payment to support patients with chronic conditions to connect to a general practice through MyMedicare to receive comprehensive, multidisciplinary team care in the community and reduce their visits to hospital.
- PHNs will work with State and Territory Local Hospital Networks to match eligible patients with a general practice or Aboriginal Community Controlled Health Service, support patients' registration through MyMedicare, and link them to broader health support services.
