

Digitally driven new models of care in general practice - webinar

Digital information and programs such as electronic prescriptions, pathology and diagnostic imaging in My Health Record can transform the quality and sustainability of health and care within general practice.

Used effectively, digital health programs can help save lives, improve health and wellbeing, and support a sustainable health system that delivers safe, high quality and effective health services for all Australians.

Presenters

Vandana Chandnani – Manager, provider adoption – Australian Digital Health Agency

Nicola Graham – Senior provider adoption lead, Australian Digital Health Agency

Learning outcomes

- benefits of the two models of electronic prescriptions
- how pathology and diagnostic imaging is included in My Health Record
- implementing digital health programs into general practice workflow.
