Navigating Mental Health, AOD and Psychosocial Supports: A bird's eye view

Recent changes to the Mental Health sector continue, and the introduction of NDIS for psychosocial disabilities has left people finding the changing landscape challenging to navigate. The Alcohol & Other Drug (AOD) Sector continues to provide some stability to people in these changing times.

This forum aims to provide up to date information about the existing and emerging range of Mental Health, AOD and psychosocial supports available, including NDIS. A key focus will be on how to navigate the sectors.

Dual Diagnosis: Working With People with Mental Health and Substance Use Concerns

An advanced webinar presented to enhance clinician's knowledge and skills in engagement, assessment and treatment interventions that support client recovery.

Collaborative Care Planning Workshop series

This workshop series aims to explore our collaborative relationships in a cross sectoral online meeting.

Be inspired by the local EMHSCA Shared Care protocol which assists in collaboration for shared care planning, engage in collaborative care planning in teams with a consumer, understand the benefits of information sharing, learn the positive impact of inclusive practice and discuss the challenges with a solution focus.

Professionals navigating the east: Change and integration

This is a full day of multi-sector service navigation for all interested staff of health and community support services. Sectoral overviews, a lunchtime Market place and break-out workshops are provided. This event is arranged in collaboration with the Eastern Regional Coordinators. An expanded program will allow for a broad range of 48 service showcases.

Mental Health & Co-occurring Issues Explored

This workshop is intended to provide participants with information and skills to assist them in their work with the complexity of collaborative care planning. A series of topical mini-workshops is provided. It is hoped that participants will gain an improved understanding of how to approach and work with certain disorders and specific cohorts in relation to co-occurring mental health issues, thus enhancing their confidence and service delivery.

NOTE: All events are intended to target workers from Mental Health (Clinical and non-clinical), AOD, Family Services, Homelessness/Housing, Community Health, Primary care, NDIS providers, Centrelink, Eastern Community Legal Centre, Disability Employment, DHHS, Local council, etc...

Cross sectoral conversations are encouraged.

The common thread is provision of services to people with mental health and co-occurring issues.

All events are **free of charge** to participants.
