#### Collaborative Care Planning Workshop

This workshop will explore the logistics of care coordination in a cross-sectoral online environment. You will have opportunity to meet and work with a range of health and community service providers.

You will learn about shared care practices, work with a person who has a lived experience of mental health recovery, hear from a carer about the challenges carers face, consider key aspects of information sharing and managing safety issues, and discuss the challenges with a focus on solutions.

#### Mental Health & Co-occurring Conditions Explored

This workshop is intended to provide participants with information and skills to assist them in their work with the complexity of collaborative care planning. A series of topical mini-workshops is provided. It is hoped that participants will gain an improved understanding of how to approach and work with certain disorders in relation to co-occurring mental health issues, thus enhancing their confidence and service delivery.

NOTE: All events target workers from Mental Health & Wellbeing (Clinical and non-clinical), AOD, Aboriginal services, Family Services, Homelessness/Housing, Community Health, Primary care, NDIS providers, Centrelink, Eastern Community Legal Centre, Disability Employment, Department staff, Local council, etc...

The common thread is provision of coordinated services to people with mental health and co-occurring issues. Cross sectoral conversations are encouraged.

All events are **free of charge** to participants.
