

Friday 12 May or Wednesday 17 May 2017

After Hours Primary Health Care Diagnostics and Prioritisation Project

For general practice, pharmacy, allied health practitioners, practice managers, community health groups and local government.

The Eastern Melbourne PHN (EMPHN) after hours team together with Jaffe Consulting is hosting a forum for relevant organisations in the EMPHN catchment to provide feedback on accessing healthcare in the after hours.

Overview

The forum will be used to obtain feedback from various primary healthcare organisations regarding the issues associated with accessing health care in the after hours.

EMPHN would like to invite General Practice, Pharmacy, Community Health, Allied Health, RACFs and other health care providers to participate in this session.

Have your say – not having primary healthcare services available in the After Hours can lead to Emergency Departments being over utilised for primary care type presentations.

EMPHN is also interested to hear about services not available in hours leading to issues in the After Hours particularly in the area of Aged Care.

Feedback obtained will be used to develop strategies to address gaps in after hour's services which will be utilised to develop an After Hours prioritization framework.

Registration

To register click on the relevant 'Register now' button.
