

Wednesday 7 March 2018

# Keeping an eye on eye health

## For GPs

The session will provide GPs with an understanding of the common eye conditions contributing to avoidable blindness and vision loss in Australia:

- practical applications to reduce the risk of blindness and vision loss among at-risk populations
- a better understanding of triggers and appropriate management of red eye(s) and superficial ocular trauma
- referring appropriately to eye health providers including optometry, ophthalmology and low vision and rehabilitation service providers

### Presenters:

Presenters will include an optometry specialist from the Australian College of Optometry and a low vision specialist from Vision Australia

### Learning outcomes:

- Identify population subgroups at increased risk of blindness and vision loss
- Integrate eye assessments within General Practice including chronic disease care plans and health assessments
- Manage and review the triggers for acute eye conditions
- Appropriately refer patients to eye health providers and rehabilitation service providers.
