

23 August 2017

# Lung cancer webinar

## Diagnosis to survivorship What's new for GPs?

### Event overview

Our expert panel will deliver two case scenarios related to typical lung cancer presentations covering the following topics:

- Using the Optimal Cancer Care Pathway for improving your patient's care
- Fast tracking referrals and MDMs
- New Investigations and Treatment Options
- Survivorship plans and early use of allied health professionals
- Palliative care options

### Learning outcomes

Integrate the Optimal Care Pathway into patient management to ensure best cancer care

Recognise the signs and symptoms of suspected lung cancer

Identify investigations required prior to referral to a specialist

Recognise the signs and symptoms associated with recurrent, residual or metastatic disease

Screen for supportive care needs and make referrals to appropriate health professionals and community based organisations.

**Webinars are limited to 100 participants**
