

23 August 2017

Technology in practice

For GP Principals, Practice Managers and GP IT Support

Technology is forever evolving. Learn about what's on the way for the primary health sector and how to best take advantage of it in your practice. This training will also showcase some of the new technologies on the market as well as how to implement a framework for evaluating your IT systems including data security, efficiency and more.

Event details

Presented by Miroslav Doncevic

Managing Director, Digital Medical Systems

Miroslav is the founder and director of Digital Medical Systems (DMS) and has over 30 years of experience working in the computer industry. DMS provides professional IT consulting, quality information and communication systems (ICT) to medical practices.

Miroslav has worked with many medical and health organisation's to deliver training in ICT to medical professionals that is relevant and easy to understand.

Topics covered

- Overview of new technologies in general practice
- Benefits of using technology for business opportunities
- Framework for evaluating your practice's IT system
- Contemporary cyber threat landscape and risk mitigation strategies.
