Triage

For practice staff

Basic triage and the allocation of appointments is something general practice staff undertake every day. The primary objective of triage guidelines is to provide a standardised approach that practice staff can use to guide these patient interactions, and that the GPs and Practice Managers can rely on to provide a measure of safety and quality to their patients.

Event details

Presented by: Eastern Melbourne GP Engagement Officer

Learning outcomes

- Describe the importance of a safe and effective triage system
- Apply the triage process, including the use of resources, in the practice
- Recognise and consider high risk categories when triaging patients
- Explain the importance of communication and documentation in the triage process
