

20 February 2020

# Spirometry training course

## For GPs and practice nurses

*Brought to you by the National Asthma Council Australia as part of the Asthma Best Practice for Health Professionals program.*

The spirometry training course provides comprehensive training in the application, measurement and interpretation of expiratory spirometry in general practice. The interactive workshop includes hands-on components to allow participants to apply their new knowledge in a practical setting.

### Presenters

**Kim Bridges**, Respiratory Scientist, Tasmanian Lung Service

**Patrick Salter**, Respiratory Scientist, Tasmanian Lung Service

### Demonstrator

**Narelle Williamson**, Respiratory Educator, National Asthma Council Australia

### Learning outcomes

- increase knowledge and awareness of the role of spirometry in primary care
- develop practical skills to recognise and perform high quality spirometry
- understand interpretation and clinical implications of spirometry results, including differential diagnosis
- increase knowledge and awareness of the importance of spirometer quality assurance and its implementation
- learn strategies to incorporate spirometry testing systematically into routine clinical practice
- increase confidence in performing, understanding and implementing spirometry.
