

3 August 2019

# Orthopaedic fracture management in primary care

## For general practitioners

Looking to manage un-displaced upper and lower limb fractures of adults and children within your practice? Join Eastern Health specialists who will discuss appropriate diagnostic imaging, common fracture management in primary care and when referral is required.

### Presented by:

**Associate Professor Raphael Hau**, Clinical Director of Orthopaedics, Eastern Health

**Mr Richard Pennington**, Orthopaedic Surgeon, Eastern Health

**Mr Wei-Han Tay**, Orthopaedic Surgeon, Eastern Health

**Dr Geoff Broomhall**, Clinical Editor, HealthPathways Melbourne, EMPHN

**Tim Jarrott**, Orthotist/Prosthetist, Director – Head to Foot Orthotics.

### Topics:

- diagnostic imaging - radiology and medical imaging for adult fractures. What are the right tests to order?
- adult fractures - upper limb and lower limb. Primary care initial and conservative care and when to refer
- other common fractures
- fracture orthoses/braces
- paediatric orthopaedics - SUFE, scoliosis, developmental dysplasia of the hip (DDH), osteomyelitis, perthes disease
- common paediatric physal fracture injuries, deformities – management and diagnosis.
