

Palliative Care and General Practice: who, what, how and when?

This event will aid in increasing GP knowledge and confidence in providing palliative care for patients, as well as improving their understanding of specialist palliative care services available in their area.

Topics

- Using HealthPathways to identify processes and support for managing palliative patients
- Applying evidence-based clinical management strategies to ensure safe and effective symptom management and end of life care for palliative patients
- Overview of Allied Care/Supportive Services provided by Specialist Palliative Care services for patients and/or their families
- Management of medication and pain for palliative care patients

North Western Melbourne PHN and Eastern Melbourne PHN are pleased to facilitate this joint palliative care and General Practice event.

Saturday, 17 June 2017
