# Health Assessments: 40-49 and 45-49

## For practice nurses

A health check between the ages of 40-49 and 45-49 can assist patients in each of these at risk groups to make the necessary lifestyle changes to prevent or delay the onset of chronic disease. This session will cover the specific eligibility criteria, claiming frequency, rules and recommended assessment tools to assist in completing these health checks. Identification of health issues and conditions including potential referral pathways and intervention options to improve health and lifestyle choices will be covered.

### Presenter

Presented by: Eastern Melbourne PHN GP  
Engagement Officer

### Learning outcomes

- Describe the eligibility criteria for each Health Assessment
- Outline the claiming frequency and rules of each Health Assessment
- Understand the specific assessment tools recommended for these age groups
- Recognise health issues and conditions within this age group
- Identify referral pathways and interventions to improve health and quality of life
