

HealthPathways Melbourne provides clinicians with a single website to access clinical and referral pathways, and resources.

Pathways are created by local GPs, working in partnership with specialists, nurses, allied health and other health professionals.

HealthPathways Melbourne aims to:

- Enhance clinical knowledge and promote best practice care
- Reduce the number of patients referred to specialist care who could be managed in a primary/community care setting
- Build collaboration and reduce fragmentation across the health service network
- Improve health outcomes by enabling consumers access to the right care, in the right place, at the right time.

HealthPathways provides clear and concise medical advice reached via consensus through local clinical working groups.

How to use HealthPathways Melbourne

Go to:

melbourne.healthpathways.org.au

1. Enter the username and the password provided to log in.
2. Select a pathway OR search for a condition/suspected illness.
3. Find the condition you are looking for, then:
 - Access symptom outlines and management options.
 - Access information about how to refer to the most appropriate local services.
