There is limited on-site parking
available at Box Hill Pavilion.
We recommend arriving ahead of
time to secure a spot

EMPHN is currently developing its unified Healthy Ageing Service Response providing mental health and holistic health services to older adults living in the community, either independently or in residential aged care facilities.

We are seeking input from professionals and members of our community to assist in designing this brand new service model.

This workshop will explore current barriers and develop ideas in order to shaping future service offerings. This workshop is for both professionals in the wider sector as well as interested community members, including carers.

Catering

A light breakfast and morning tea will be provided
