

Curing hepatitis C: Your questions answered

Online Q&A - 19 April 2017 - 7.00pm-8.00pm

This session will provide the opportunity to have your questions answered by a hepatitis specialist, helping you addressing any challenges or issues you have faced when treating your patients with hepatitis C.

This one-hour interactive online session via Skype, will provide GPs with the opportunity to:

- Have their questions about hepatitis C answered by a hepatitis specialist;
- Listen to other GP's questions and challenges;
- Gain further knowledge about hepatitis C treatment and management.

By the end of this session you will be able to:

- Explore common treatment options for patients with hepatitis C.
- Investigate key management challenges in patients with hepatitis C.
- Access referral pathways and best practice guidelines.

Speaker:

Dr Thomas Schulz is an Infectious Diseases Physician at the Victorian Infectious Diseases Service. He has clinical appointments with the Royal Melbourne and Royal Women's Hospitals and is a Lecturer at The University of Melbourne. He is also involved in the integrated hepatitis service, providing care for those with hepatitis B and C in the community; and conducts outreach clinics in various locations throughout Victoria.

Participants will need to login in via Skype.

A link to join will be sent, via email, to registered participants prior to this online session.
