

Improving the patient journey with HealthPathways Melbourne

Join the HealthPathways Melbourne team as we walk you through our award-winning tool that will assist any local GP in directing a patient's journey. Learn about HealthPathways, have your questions answered and hear directly from a Clinical Editor that works on the pages daily.

Event details

HealthPathways empowers clinicians with locally agreed information to make the best decisions, together with patients, at the point of care. HealthPathways is designed and written for use during a consultation. Each pathway provides clear and concise guidance for assessing and managing a patient with a particular symptom or condition.

Pathways include information about making referrals to services in the local health system. Each pathway is evidence-informed, reflects local reality, and aims to preserve clinical autonomy and patient choice. HealthPathways serves to reduce unwarranted variation, and accelerate evidence into practice to ensure better and safer care. HealthPathways programs are developed by PHNs across every state and territory in Australia.

Recently developed pathway suites include:

- Aged Care and Advance Care Planning
- Palliative Care
- Sexual Health
- Cardiology
- Paediatrics
- ENT

Objectives of the webinar:

- Demonstrate how to navigate HPM
- Demonstrate the practical applications of HPM into general practice and how to make HPM a part of your daily practice
- A walk through of the top 3-5 most frequently used pathways and relevant case studies
- New and upcoming pathways
