

HealthPathways Melbourne provides clinicians with a single website to access clinical and referral pathways, and resources.

Pathways are created by local GPs, working in partnership with specialists, nurses, allied health and other health professionals.

### HealthPathways Melbourne aims to:

- Enhance clinical knowledge and promote best practice care
- Reduce the number of patients referred to specialist care who could be managed in a primary/community care setting
- Build collaboration and reduce fragmentation across the health service network
- Improve health outcomes by enabling consumers access to the right care, in the right place, at the right time.

**HealthPathways provides clear and concise medical advice reached via consensus through local clinical working groups.**

### How to use HealthPathways Melbourne

To obtain a login go to [melbourne.healthpathways.org.au](http://melbourne.healthpathways.org.au), click on and complete the request access link.

1. Enter the username and the password to log in.
2. Select a pathway OR search for a condition/suspected illness.
3. Find the condition you are looking for, then:
  - Access symptom outlines and management options.
  - Access information about how to refer to the most appropriate local services.

### Get involved!

To request a demonstration or to provide expertise for new pathways email:
