## Monash Neurovascular Team presents **Cerebral Aneurysms: When to worry? Which headaches and which patients?** GP Educational Seminar 2017

### **Cerebral Aneurysms: When to worry? Which Headaches and which patients?**

This seminar will provide up to date, evidence based and practical information on investigation and management for patients with brain aneurysms. Including interactive Q&A sessions.

Some of the topics include:

- How to recognise headache suspicious for subarachnoid haemorrhage.
- When and how to screen for brain aneurysms.
- What to do if your patient has an incidental brain aneurysm.
- What are the management options for a patient with a brain aneurysm.
- What to expect after brain aneurysm treatment.
- How to refer to the Monash Neurovascular team.

### **Presenters**

A/Prof Andrew Danks, Neurosurgeon, A/Prof Winston Chong, Interventional Neuroradiologist  
Dr Chris Xenos, Neurosurgeon, Dr Lee-Anne Slater, Interventional Neuroradiologist,  
A/Prof Ronil V Chandra, Interventional Neuroradiologist, Dr Leon Lai, Neurosurgeon
