

# Lung Cancer Virtual Masterclass

*A Multidisciplinary Evening*

This CPD activity is a virtual introduction to a lung cancer multidisciplinary masterclass.

Lung cancer is the leading cause of cancer death in Australia with more than 12,500 people diagnosed each year. GPs play an important role in managing those who have or may have lung cancer by supporting early and rapid referral into cancer care pathways. The presentations will provide GPs with information on updated lung cancer screening processes and discuss the surgical advances in lung disease management.

The evening will provide GPs with an opportunity to gain further knowledge regarding lung cancer and a multidisciplinary approach to care.

## Event Details

- Date** Wednesday 4 November 2020
