

My Health Record expansion: benefits for you and your patients

For GPs, specialists, pharmacists, allied health professionals and practice managers

Eastern Melbourne Primary Health Network (EMPHN) invites you to an interactive multi-disciplinary workshop focusing on the expansion of the national My Health Record system. All healthcare providers and practice managers are welcome to attend.

This workshop will include a broad overview of My Health Record including the benefits and strategies on how you may embed its use within your day-to-day practice.

Here is your opportunity to network with your peers and other healthcare providers within the EMPHN catchment and learn about how they are using the system and engaging with their clients/patients to drive uptake of the My Health Record system.

This workshop will:

- Clarify privacy and consent obligations and address medico-legal concerns you may have in the context of the My Health Record system
- Assist you to respond to enquiries from your clients/patients about benefits and how they can manage their My Health Record

A detailed workshop program will be circulated closer to the event.
