[CM_PATIENT_ETHNICITY] table not currently collected by GRHANITE XML

Software: Best Practice

Version: Summit 2014 Build 1.8.4.642

Ethnicity is retrieved from the [ETHNICCODE] column in the [PATIENTS] table.

This is populated from the Demographics\Edit patient form:

A screenshot of the 'Demographics\Edit patient form' showing various fields. The 'Ethnicity' dropdown menu is open, displaying a list of options: Aboriginal, Torres Strait Islander, Aboriginal/Torres Strait Islander, Non Aboriginal/Torres Strait Islander, Australian, and Other. The 'Ethnicity' field is highlighted with a red box. Other visible fields include Date of Birth, Sex, Address Line 1, Address Line 2, City/Suburb, Postal Address, and Postcode.
