

# GP respiratory clinics in eastern and north-eastern Melbourne

The Australian Government is establishing GP respiratory clinics around the country to assess people with fever, cough, a sore throat, or shortness of breath. These are being rolled out gradually.

## Local COVID-19 Respiratory Clinics open and taking appointments:

EACH, 46 Warrandyte Road, Ringwood  
Monday to Friday 8.30am-4pm  
by appointment only (03) 8595 1333.

A further two clinics are planned in EMPHN's catchment. The Australian Government is assessing potential clinics and we will advise once these are in operation.

**each**

## What you need to do

### Before attending the clinic, call.

Every caller will be assessed against the most current testing criteria and given an appointment to be screened if applicable. At this time, the clinic is unable to see walk-ins.

**When arriving on site, please remain in your vehicle** and follow the directions of staff on site who will guide you to a parking space and advise next steps.

During this time of heightened anxiety, the clinic is working as quickly as possible to see all community members who attend for screening.
