

SafeScript essentials for general practice

For GPs and practice nurses

QUM In-Practice Educational Visiting Program 2019

- deaths from pharmaceutical drug overdose exceed the road toll in Victoria
- the Victorian Government is implementing SafeScript across Victoria
- SafeScript is a clinical tool that will provide access to a patient's prescription supply history for target high-risk medicines and enable safer clinical decisions
- supply history for monitored medicines has been captured in SafeScript since July 2018
- use of SafeScript will become mandatory in April 2020

Presented by:

Christine Bellamy
Pharmacist, Quality Use of Medicines Lead

What will be covered:

- overview of SafeScript – what, when, how
- changes in the S8 permit requirements when SafeScript is used
- availability of GP Clinical Advisors, and patient support
- approaches to managing patients who are at risk of high-risk medicine misuse
- resources and supports for practitioners and patients.
