SafeScript training – be prepared

For prescribers and pharmacists

Mandatory use of SafeScript commences 1 April 2020. Be ready to use SafeScript - come along to a presentation by a GP and pharmacist with experience in using SafeScript as a clinical tool in everyday practice.

Event overview

- deaths from pharmaceutical drug overdose exceed the road toll
- SafeScript allows doctors and pharmacists to view the supply history of certain high-risk medicines at the point of consultation / dispensing
- supply history for monitored medicines has been captured in SafeScript since July 2018
- integration with clinical software allows streamlined access
- supports for clinicians and consumers are in place to address safer prescribing and continuum of care
- prescribers and pharmacists have complementary obligations for safe use of medicines - joint training sessions will promote collaborative approaches to patient support in the SafeScript environment.

Training will cover

- an overview of SafeScript – what, when, how and regulations
- best practice for prescribing and dispensing of high-risk monitored medicines
- approaches to managing people who are at risk of high-risk medicine misuse
- resources and supports for practitioners and patients.
