Suicide Prevention Training

For General Practice Managers and Practice Staff

General Practice Managers and Practice Staff often need to triage patients. Wesley LifeForce has developed this training to help frontline staff recognise and respond effectively to signs that a patient is experiencing mental distress.

Wesley LifeForce and UnitingCare Regen's presentation of this training supports Eastern Melbourne PHN's Place-Based Suicide Prevention trial in the City of Whittlesea.

Event overview

Wesley LifeForce training is developed from evidence-based expertise in the Australian Community and with input from Australian GPs, General Practice Nurses and Practice Managers.

The workshop will highlight the important role General Practice Managers and Practice staff have in identifying patients at risk of suicide.

Learning outcomes:

- Ability to identify patients who may be at risk of suicide when presenting to the practice
- Increased understanding of what to do when concerned that a patient may be at risk of suicide.

Event Details

Date: Thursday 22 February 2018

Venue: Uni Hill Conference Centre
30 Graduate Road,
Bundoora

Time: 6.00pm (registration & light supper)
