23 October 2019

IT security in general practice
For GP principals, GP IT support and practice Managers

Security is a key foundation for information technology. With the increased use of technology comes an increased need to be aware of keeping health information secure.
Join us for an explanation of the key components of a medical IT network, threats and simple solutions.

Event details

Presented by Jim Doumakis
Director, Jose Health IT

Jim Doumakis has been in IT security for over 25 years and has been working in Health IT since 2002 working on very large complex networks and databases to sole practitioners.

Topics Covered

- what is a medical IT network?
- what are the threats to the network?
- simple solutions and how to protect your network
- current case studies.
