Technology in practice

For GP Principals and Practice Managers

The world of IT is an ever changing industry. Technology in practice aims to explain how to choose the right online appointment system and consider whether installing a kiosk is right for your practice. Join a discussion around the current issues in IT security for small business and the importance of maintaining safe and viable systems. The session will provide the latest news on cloud-based products and an overview of what a managed IT service provider should be doing for your practice.

Event details

Presented by Miroslav Doncevic

Managing Director, Digital Medical Systems

Miroslav is the founder and director of Digital Medical Systems (DMS) and has over 30 years of experience working in the computer industry. DMS provides professional IT consulting, quality information and communication systems (ICT) to medical practices.

Miroslav has worked with many medical and health organisation's to deliver training in ICT to medical professionals that is relevant and easy to understand.
