

Primary Care Management of Myocarditis and Pericarditis After mRNA COVID-19 Vaccines

This event will provide GPs with guidance on the identification and management of myocarditis and pericarditis following mRNA vaccination

Myocarditis (inflammation of cardiac muscle) and/or pericarditis (inflammation of pericardium) following mRNA COVID-19 vaccines is predominantly seen in younger males including adolescents up to 2 weeks following vaccination.

Guest speakers:

- Dr Scott Parsons – GP Clinical Editor, HealthPathways Melbourne.
- A/Prof Nigel Crawford – Director, SAFEVIC, Chair, ATAGI.
- Dr Bryn Jones – Deputy Director of Cardiology, Royal Children's Hospital.

Learning outcomes:

1. Identification and assessment of myocarditis and pericarditis following mRNA COVID-19 Vaccination
2. Understanding management and referral guidelines

Q&A at the end of the event.

Event details

When: 6.30pm – 7.30pm, Tuesday 28 September 2021
