Wound Management in General Practice

For Practice Nurses and GPs

This session is aimed at nurses working in general practice and general practitioners. It includes an introduction to normal wound healing, factors that influence healing, wound tissue assessment and documentation, discussion of wound types and most common treatment pathways seen in general practice

Event Overview

Presented by Jan Rice

Jan Rice is a leading expert with over 30 years' experience of specific wound training in wound care. She holds a Masters in Wound Care and runs her own consultancy, *Wound Care Services* consulting in aged care, acute private surgical hospitals and private homes. She has authored many short papers on wound management, co-authored book chapters and a training manual in plastic surgical nursing and is a consultant on various advisory committees

Topics Covered

- Assessment of wounds and surrounding skin
- Effective treatment decisions, initiating further investigations and timely specialist referrals
- Monitoring & evaluating treatment outcomes
- Psychosocial impact wounds on patients

Registrations

All registrations must be received by 14 September.

Registration numbers are capped and priority will be given to General Practice Nurses and GPs working in the Eastern Melbourne PHN catchment.
