

BERTIE is here!

Victorian PHNs are pleased to announce that BERTIE – Better lives for residents through innovative education - has launched and is available to all staff working in residential aged care homes in Victoria.

BERTIE is a free comprehensive and evidence-based learning package that seeks to support the residential aged care home workforce to increase awareness and management of deteriorating conditions in residents.

Who is the training for?

The BERTIE education package is for all clinical and non-clinical staff working in residential aged care in Victoria. It is not mandatory training, however it has been designed and developed to benefit all members of the workforce and assist them to upskill, and recognise and manage early signs of deteriorating health.

BERTIE is presented in an innovative and easy-to-digest 20-module self-paced package, with each module consisting of a short engaging video, summary sheet and quick quiz.

How to access

BERTIE can be accessed through the Aged Care Quality and Safety Commission's ALIS platform. Simply log into your existing account or register your facility to access.
