

Comprehensive telehealth training

For best practice care outcomes

Residential Aged Care

Telehealth Training Program

Why is this needed?

Telehealth in aged care is growing fast. This training program is designed to promote best practice across the sector.

Who's it for?

This training program is for anyone who supports telehealth in residential aged care settings. Including personal care workers, nurses, managers, onsite clinicians and other health professionals.

How does it work?

The training is made up of a series of short digital learning modules, with an optional up-front diagnostic to help learners decide which modules to complete.

- Modules are about 6 minutes long so they can fit around busy schedules.
- Each module provides practical advice, a checklist and resources to help apply learning quickly.
- Plain language, closed captions and videos help make the materials more accessible.
- Nurses and GPs can claim CPD points for completing the training.

phn
COOPERATIVE

An Australian Government Initiative

This training has been made possible through funding provided by the Australian Government under the PHN Program.

What does it cover?

It covers all aspects of telehealth including working with remote-end clinicians and care teams, plus onsite staff, residents, families and carers.

What are the benefits?

- More regular resident health check-ins can lead to positive health outcomes.
- Online sharing of health records and results enhances care coordination.
- Remote care progress monitoring alerts clinicians to emerging issues.
- Online case conferencing is quick and easy, enhancing care planning.
- Remote access to a wider range of specialists enhances care outcomes.
- Telehealth delivered medical services can improve access for rural and remote aged care residents.
