

# Evaluation Summary of Vulnerable Peoples Vaccination Program (VVP)

## Program objectives

Actively engage with vulnerable communities and provide tailored vaccinations

Provide information and support to vulnerable patients about vaccinations

Improve access to COVID-19 and influenza vaccinations for vulnerable populations

## Outcome data for vaccination hubs

COVID Vaccinations administered  
**2,608**

Influenza vaccinations administered  
**903**

Vaccination activities  
**244**

Other supporting activities  
**251** Assertive outreach to organisations  
**44** Data cleansing  
**12** Pop-up information stalls  
**35** Educational activities  
**92** Social media/Promotional activity  
**5** App development (Pharmacy vaccinations)

Vaccination activities undertaken  
**110** On-site  
**109** Off-site  
**17** Homebound visits  
**8** EMPHN referrals supporting Residential Aged Care Homes (RACHs)

**100% of participating providers reported relationships with vulnerable groups were established and were likely to continue beyond the program.**

### Off-site visits included:

- Residential Aged Care Homes
- Soup Kitchens
- Crisis Centres
- Local Schools
- A Rotary Market
- Event for First Nations People
- Community Centres
- Libraries

All 12 EMPHN LGA's were covered by  
**11 GP Hubs and 7 Pharmacy Hubs**

Statewide campaign reached  
**80,372 people**

Nurse immuniser scholarships  
**40 nurses**

Provider feedback reported that of the vulnerable groups, engagement was made up of:

**67% from Residential Aged Care Homes (RACHs)**

**17% was with culturally and linguistically diverse (CALD) groups**

**8% was with people with disabilities and homebound individuals**

“

The program provided education and information to this group, helping them understand the importance of vaccination and where they could access it. Outreach efforts also connected individuals with services that could meet their broader health needs, helping to build trust and improve engagement with healthcare providers.
