

From hospital to home: Coordinated heart failure care in general practice

Webinar

This webinar will help support general practice teams strengthen early post-discharge heart failure care, with expert insights, evidence updates, and practical strategies for follow-up, medication management, monitoring, self-management, and escalation.

You'll hear from expert primary care health professionals:

Cardiologist

Dr Vicki Pandeli on why primary care-led optimisation is expected, supported and essential between hospital visits.

General practitioner

Assoc Prof Ralph Audehm on translating guidelines into real-world workflows, recall systems and team roles.

Consultant pharmacist

Mr Brian Meier on medicines optimisation, deprescribing and supporting adherence and patient understanding.

Cardiac clinical nurse specialist

Ms Kirsten Sandstrom on nurse-led monitoring, education, vaccination and coordination that sustain long-term heart failure care.

Don't miss this opportunity to explore coordinated multidisciplinary approaches, evidence-informed community management decisions, and simple, measurable plans for practice implementation.

AUDIENCE

General practitioners
Practice nurses
Practice managers
Pharmacists
Other multidisciplinary primary care clinicians
