

Lunch & Learn: My Health Record – What's New in 2026

My Health Record securely connects healthcare providers such as general practices, residential aged care homes, allied health services and hospitals. Providers can instantly view and upload vital health information—such as medication history, allergies, immunisation, pathology, radiology and health summaries ensuring continuous, high-quality care and avoiding duplication.

This lunch and learn will give an overview of My Health Record Including new changes that have come into effect such as Better Faster Access which is a legislative requirement for information to be shared by default and amending the 7-day delay to provide patients with access to most of their results as soon as they have been released to the My Health Record.

Additionally, the My Health Records Rule 2016 (the 2016 Rule) has been replaced with the My Health Records Rules 2026 (the 2026 Rules), effective 1 April 2026.
