POLAR Walkthrough – Identify patients with an active diagnosis of Diabetes Mellitus needing a General Practice Chronic Condition Management Plan (GPCCMP) or review of GPCCMP
Also (Prioritising Patients at Urgent risk of Hospitalisation)

Step 1

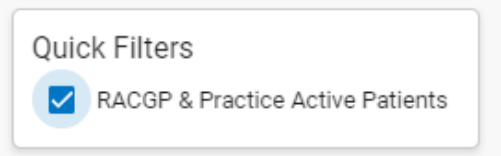

Open POLAR and from Reports Select Clinic Summary Report

Polarexplorer.org.au/login

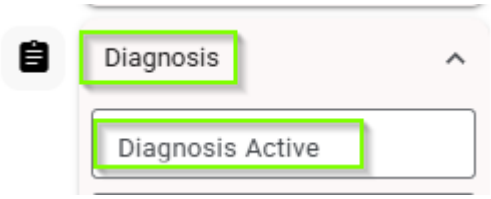

Step 2

Select the Quick Filter RACGP& Practice Active patients shortcut

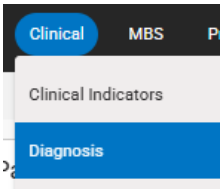

Step 3

Select Diagnosis Filter and select active diagnosis

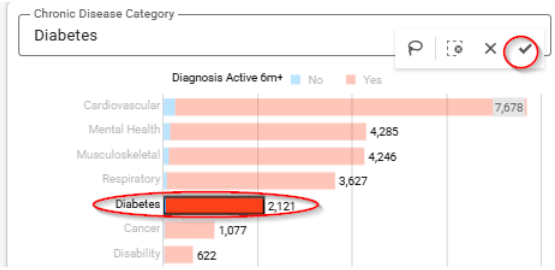

Step 4

Select Clinical then Diagnosis report

Step 5

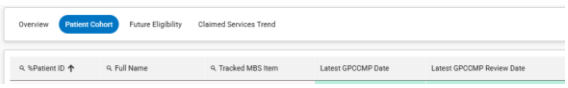

Select Diabetes from the Chronic Disease category.

Step 6

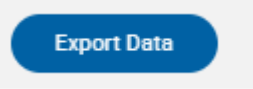

Select MBS/Tracked MBS

Select the Patient Cohort tab

Step 7

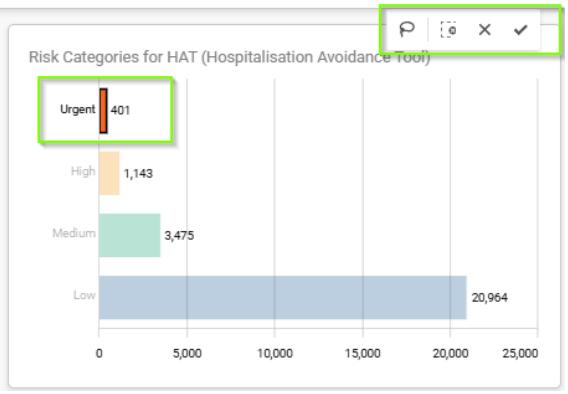

Export the table this can then be further sorted by Provider etc..

Step 8

To prioritise patients most at risk go to the dashboard page leaving all the current filters on and add the filter for the Urgent patients at risk of hospitalisation and confirm the selection.

Return to the Tracked MBS page the numbers will have changed as you are now have a list of Active/RACGP Active patients with an active diagnosis of Diabetes Mellitus who are most at risk of hospitalisation needing a GPCCMP or Review of GPCCMP. Export the table from the patient cohort tab.
